Buckets

Our range of buckets, manufactured by Cherry Products, are specifically designed for skidsteers, tractor loaders, telescopic materials handlers, and loading shovels. These buckets are built for strength and wearability in a range of capacities to suit each material and loader type. The main bucket skins are folded to form a box section across the width of bucket giving strength and rigidity. The bucket heels are either folded or rolled with wear points under the floor. Added to this, side stiffeners and steel wraps surround the bucket onto which the brackets are welded. A hard wearing high carbon leading edge is fitted as standard making this attachment suitable for many applications.

Standard Width Options, recommended for Tractor Loaders, Skidsteers & Compact Loading Shovels, 1220mm (4'), 1370mm (4'6"), 1525mm (5'), 1680mm (5'6"), 1830mm (6'), and for Large Tractor Loaders, Telescopic handlers, and Small Loading Shovels, 1980mm (6'6"), 2133mm (7"), 2286mm (7'6"), 2440mm (8').

Options available include, strengthening side gussets, Load spill guards, and replaceable bolt on wear plates.

All Weights and measurements are approximate. MT Equipment and their suppliers reserve the right to alter specification without prior notice or consultation. All prices are subject to VAT and delivery. All new attachments are manufactured to order, Availability times are approximate and may be subject to change.
